

# FIX 2020 Election and *We Start to FIX Everything Else*

Politicians not representing the people

COVID-19

Vax mandates

Mask mandates

CRT

Etc, etc.

# New Hampshire

Governor Sununu had arrested

People who turned their backs on him

New Hampshire Voter Integrity Group

Arrested parents in front of children

27 million Fed bribe to governor

# Arizona

The Maricopa County, AZ audit showed that no records could be found for one out of every 10 votes

Attorney General is a Rino who probably will not prosecute. Slow walking while talking tough.

# Delaware

Not certifiable!

*One nursing home, 315% turn out!*

*Lauren Witzke :*

*“I’ll reclaim my stolen senate seat.”*

# New Jersey

Wendy Rogers, Lt Col USAF (ret):

Then, all of a sudden, in the middle of the night, after 100% reported in, Bergen had 40,000 votes drop to flip to blue.

And that wasn't all!

Sussex County was misreported by a mere 35,000 votes. Salem County didn't report at all. Hudson County double-counted 15,000 votes- THAT WE KNOW OF. The Democrat Secretary of State STILL doesn't know how many outstanding votes there are!

# Wisconsin

Racine County Sheriff Christopher Schmaling announced that Wisconsin's election statutes were violated in the 2020 election.

Further, he said, "Election statute was in fact not just broken, but shattered by members of the Wisconsin Elections Commission (WEC)."

# Wisconsin

Wisconsin Attorney General did not want  
the evidence from Racine County Sheriff

# Armstrong County, PA

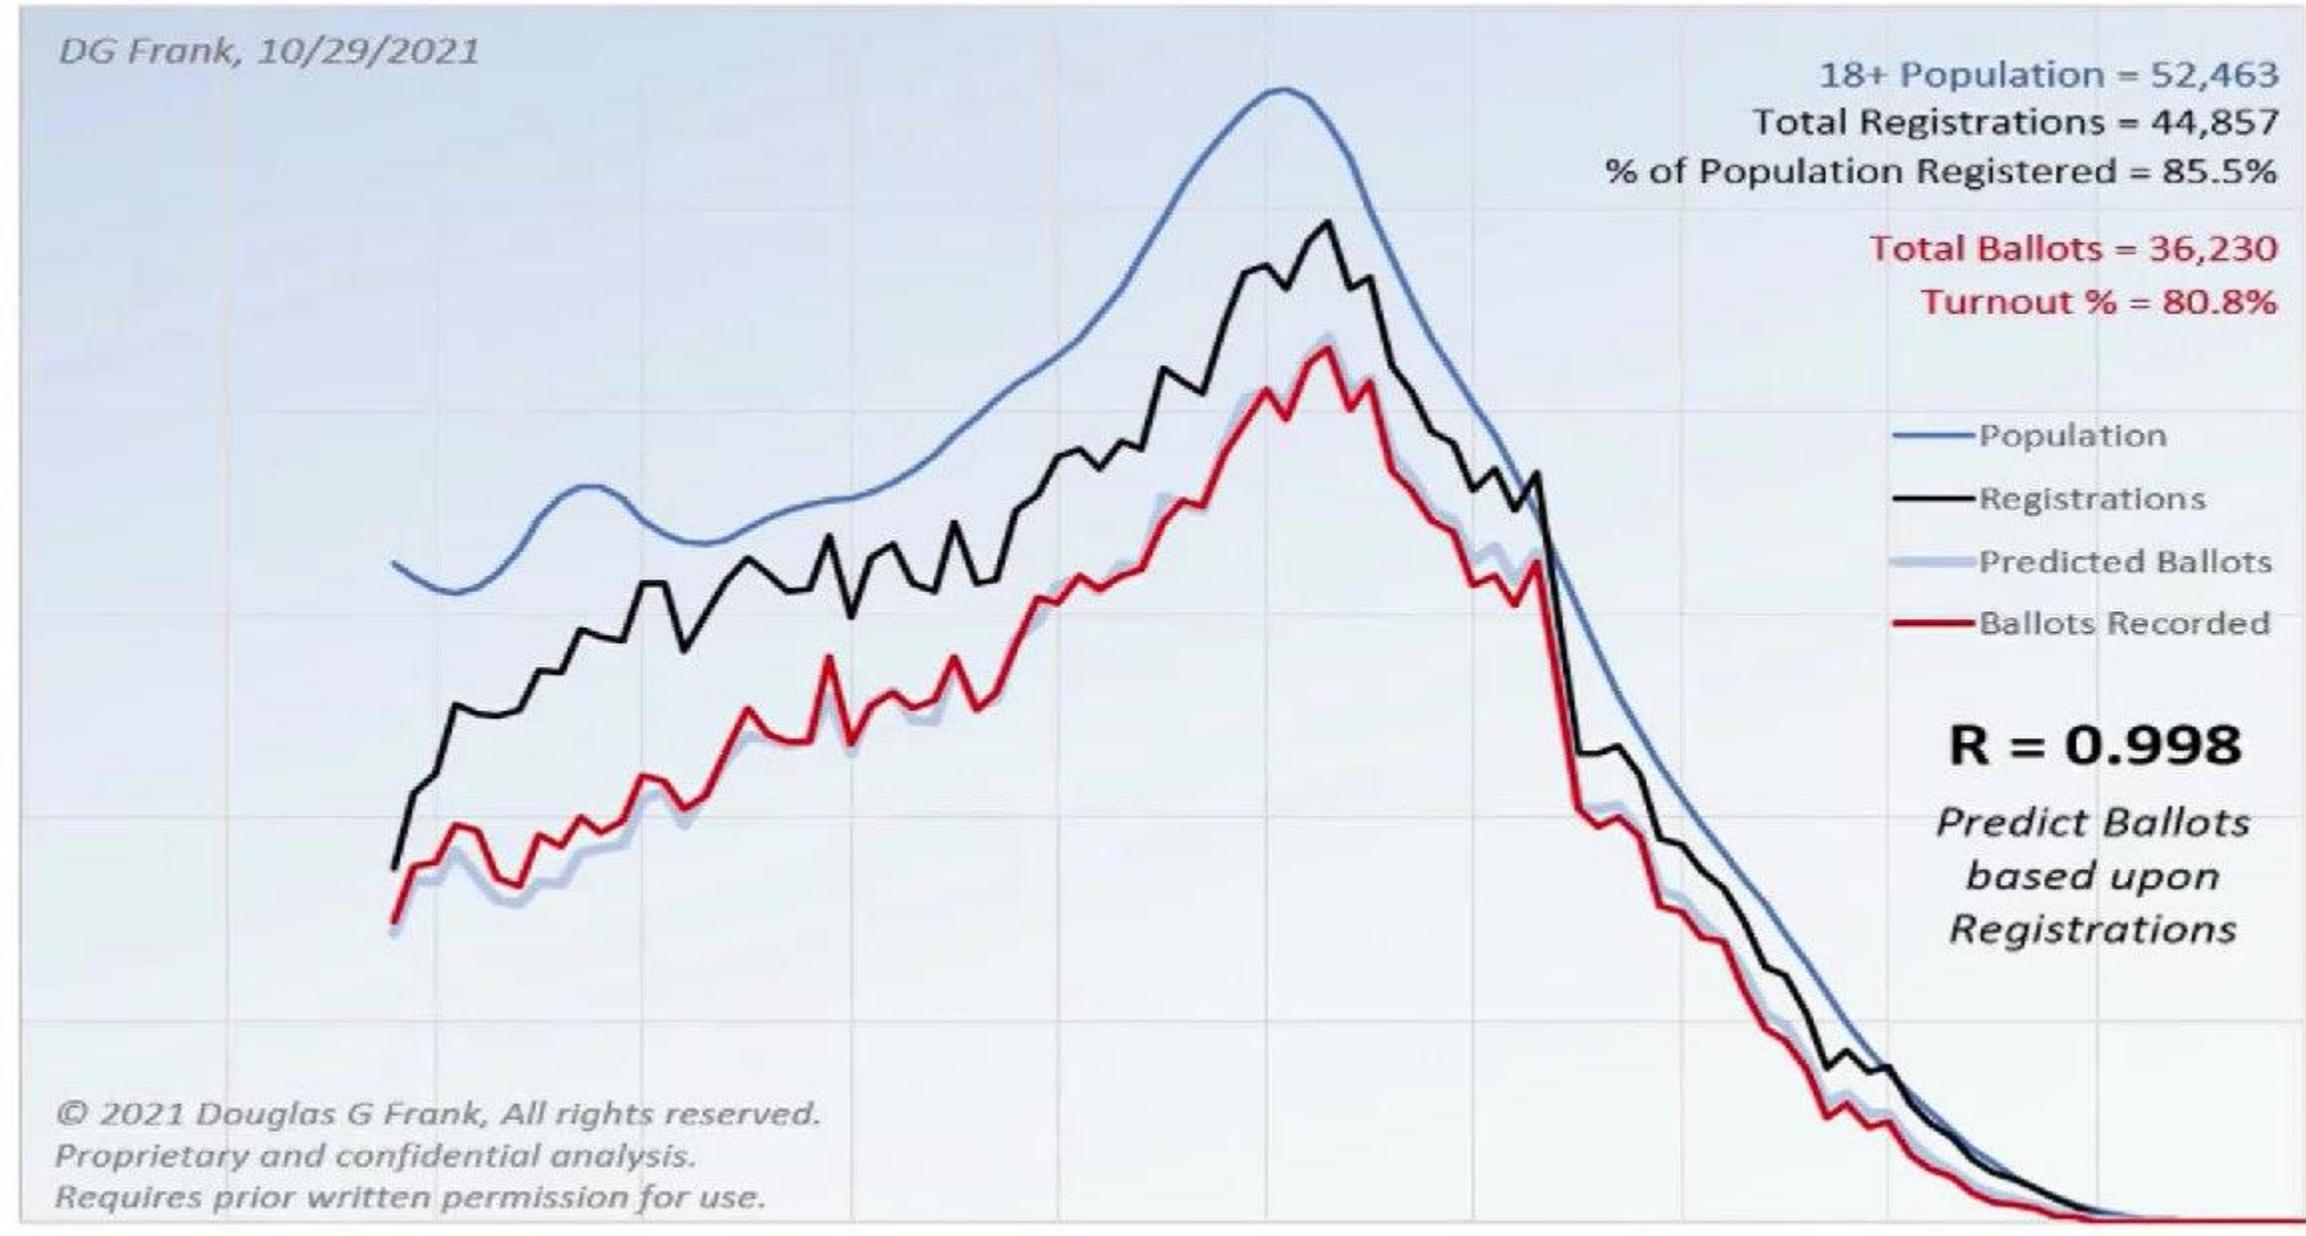

DG Frank, 10/29/2021

18+ Population = 52,463

Age

# Georgia

State officials have begun the process of taking Fulton county's election management into receivership, removing local control for the 2022 election and beyond

# Is the Media telling you this?

(Rasmussen Reports)

"How likely is it that cheating affected the outcome of the 2020 presidential election?"

Majority Likely:

April 2021 - 51%

October 2021 - 56%

# Deserve Answers

QUOTE: If questioning the results of a presidential election were a crime, as many have asserted in the wake of the controversial 2020 election and its aftermath, then much of the Democratic Party and media establishment should have been indicted for their behavior following the 2016 election. In fact, the last time Democrats fully accepted the legitimacy of a presidential election they lost was in 1988.

[Over 30 years ago.]

# Deserve Answers

QUOTE: What happened during the 2020 election must be investigated and discussed, not in **spite** of media and political opposition to an open inquiry, but **because** of that opposition. The American people deserve to know what happened.

They deserve answers, even if those answers are inconvenient.

They deserve to know the effect flooding the system with tens of millions of mail-in ballots had on their vote.

They deserve to know how and why Big Tech and the corporate political media manipulated the news to support certain political narratives while censoring stories they now admit were true.

They deserve to know why courts were allowed to unilaterally rewrite the rules in the middle of the contest, often without the consent of the legislative bodies charged with writing election laws.

# Reported Lawsuits

- Mr Lindell has now leaked it publicly that they are about to file several lawsuits, including Supreme Court pleadings.
- These will rock the world.
- We are winning.
- The momentum is growing.
- Engage.

From Dr. Frank:

I've analyzed about 2500 US counties so far, and I've been able to predict the voter demographics in all but four of them (and I am glad!)

For months, I've been saying that phantom voters are mined at the precinct level and voter demographics are regulated at the county level. That is because in my early work, that is what I was finding.

However, as my analysis sphere has grown, I've discovered that in some states not only can I predict the voter demographics at the county level, but also the precinct level.

And get this... in these highly regulated states, not only can I predict the number of voters of each age, but also the precise numbers of Republican and Democrat voters. It is uncanny.

I'm formally working up these results (for the upcoming Supreme Court case), and I'll be sharing them with you shortly.

# Should You Vote?

From Dr. Frank:

As I am speaking to groups around the country, people are asking me whether they should vote... since the system is so corrupt.

**ABSOLUTELY.**

Until we get back to "Voting Amish" (all paper, no electricity), our only recourse is to overwhelm the manipulating algorithms.

To illustrate, if there are only 100 eligible voters in a community and they all vote, then there is no credit line of phantom voters remaining to manipulate... no one would believe the outcome if there were 120 ballots received...

Where we get into trouble is when the real turnouts are only 50% of eligible voters, allowing the bad guys to stuff the ballot boxes with phantom ballots.

Everyone needs to vote... and encourage their friends to vote.

We the people have to reclaim our role as the real government.

# Election Fraud Phases

From Sidney Powell:

Former Michigan Senator Patrick Colbeck gives an excellent breakdown of the 2020 election robbery from a systems engineering perspective.

Colbeck partitions the steal into 4 phases:

- 1) Preparation
- 2) Main Attack
- 3) Backup Attack
- 4) Defense

# Election Fraud Phases

## 1) Preparation

The key goal of this phase is to **create and exploit weaknesses** in our election system. How? By weakening the election record chain of custody for the (i) qualified voter file (QVF), (ii) poll books, (iii) ballots, and (iv) vote tally.

The criminals start by seeding the QVF. For example, there were more than 616K ineligible voters in the Michigan QVF heading into the 2020 election.

Other weakening measures include no-excuse absentee voting, same-day voter registration, elimination of voter ID and signature verification requirements, and centralized, networked, voting systems. All of these erosions reduce the number of bad actors needed to steal an election.

# Election Fraud Phases

## 2) Main Attack

The central tool in this second phase is **ballot stuffing** via mail-in votes, enabled by seeding the QVF with low propensity and ineligible voters.

Importantly, phase 2 requires an accurate prediction of voter turnout to be successful. If those forecasts fail (as they did in the 2020 election), the perpetrators have to shift to a backup plan, the Backup Attack phase.

# Election Fraud Phases

## 3) Backup Attack

Phase 3 involves **algorithmic manipulation of the vote tally** when ballot stuffing isn't netting enough votes.

Lady Draza identified a digital fingerprint for something called the "PID controller" during this phase. As she was monitoring the election night results in multiple states, she noticed the cumulative vote total would periodically drop to zero in the Edison reporting stream before surging back up. This is NOT normal.

Once the vote tallies have been altered, ballots must be added for reconciliation. And, that's exactly what we saw with the 3AM ballot drop-offs at the TCF center and the halted late-night vote counts in every swing state.

# Election Fraud Phases

## 4) Defense

The defense phase involves **ensorship and evidence destruction**.

Colbeck says canvassing is critical to combat the fraud and recommends starting with the QVF.

Also, on Colbeck's investigation wish list: *an audit of the election night reporting results, from the precinct level to the New York Times*. No one has done this yet.

# Suit to Supreme Court

- November 23<sup>rd</sup>, Attorney Generals suing U.S. Government over election fraud to Supreme Court
- To stay updated, go to [frankspeech.com](http://frankspeech.com) and [lindell.tv](http://lindell.tv)

## Mike Lindell

- If we don't get rid of the machines before 2022, the country is gone
- They may have let Republicans win in Virginia so people would get complacent

# What to do?

Pray

Study the Bible

Realize what government is supposed to be:

**WE THE PEOPLE!**

**Engage!** Inform others of the evidence

“Let's go Brandon” popularity means the country is getting closer to being ready to remove Biden from an office he should have never occupied.

*Isaiah 59:1 Behold, the Lord's hand is not shortened, that it cannot save: neither is his ear heavy, that it cannot hear.*
